Customize your shades in 5 easy steps

1 SELECT YOUR SHADE TYPE

First, select your shade style. Choose from our popular horizontal wood collection or select an elegant roman shade, a classic roller blind or a trendy panel track.

2 SELECT THE BASE MATERIAL

Then, select a base material. The wood collection offers shades in 2" horizontals in basswood, and 2" or 2.5" in ecowood. For your roman shades, roller blinds and panel tracks, you can choose to go with a 3% Sheerweave, a Versa sheer for a light-filtering shade, a No-Lite opaque blind for a room darkening effect, or even an Eco Tex weave to create a warm and natural look.

3 CUSTOMIZE YOUR COLOR

Then, for an extra touch, you can customize your shade by selecting your own color. For a custom color match, you will need to provide us with a color reference item such as a cabinet, a wood sample, a swatch of your favorite fabric, a wallpaper sample or paint color. You may also specify a color from the Pantone chart.

4 CUSTOMIZE YOUR PATTERN

a) As well as your own color, you can create your own pattern, border, or logo. There again, you will have to provide us with a reference item, such as a fabric, a wallpaper sample or a sketch.

Examples:

b) If you already have the picture or logo we may apply this to your favorite CARSAN blind. The picture or logo electronic file must be of a high resolution JPEG, TIFF or PDF format.

5 APPROVAL PROCESS

Lastly, a sample of your customized base material will be sent back to you for your approval. If accepted, please sign the sample and return it to us. Alternatively, please indicate any changes and return these to us. The necessary corrections will be made and will be put through the approval process once again.

Please, note that there may be a slight color variation, which is within established industry standards.
